BurlCoGIS.gdb- File geodatabase containing Burlington County GIS data as 1/10/2018:

- PAR_BC_Parcels - feature class source data was created by NJ Office of Information Technology, Office of GIS by edgematching Burlington County's parcels at township and county borders in 2009-2010. Attribute table was edited by Burlington County to add NEWGISID & ALT_ID and several other fields (see metadata for details). Updates subsequent to 2010 have been completed by Burlington County.
- PAR_CountyWideMOD4 table-

table containing County-wide MOD4 tax assessor ownership information. Can be linked/related/joined to PAR_BC_Parcels using the Newgisid or TaxPin. Downloaded 8/13/15
- PAR_PropertyClassCodes table – Table that can be joined to MOD4 ownership data based on Prop_class field that contains more descriptive attributes for Property Class Codes
- PAR_QualifierCodes table - Table that can be joined to MOD4 ownership data based on Qualifier field that contains more descriptive attributes for Qualifier Codes

Documentation

- Individual_metadata\ - folder containing individual metadata for each township
- Parcels_classic.htm & Parcels_FAQ.htm - 2 metadata files updated to show attribute field additions by Burlington County
- GIS Parcel Property Class Codes and Qualifiers.pdf – PDF file listing the various property class codes and qualifiers that can be found in the ownership information
- Explanation of Accessing Descriptive Property Classes Through Joins.pdf
- NJ Composite Parcels metadata 021315.pdf – metadata for full state-wide composite parcels layer

Important items to note:

- Each township is updated separately and are not all current to one date. See the list below for the dates that the parcels were updated for each individual township.
- All records in CountyWideMOD4 table were downloaded 8/13/15 and therefore may be out of sync with older parcels. For MOD4 data that is synchronized with the date that the parcels for a specific township were last updated, use the individual MOD4 tax assessor ownership table that is supplied in the Ownership folder supplied. The download date of the individual MOD4 ownership .dbf files corresponds to the update date listed below for each township.
- **Updates have resumed as of August 2011. Separate ownership .DBF files will not be provided for townships updated in or after August 2011.**

These procedures apply to all updates:

- Topology rule “Must Not Overlap” was used
- New parcels were digitized from scanned tax maps which were georeferenced to 2012 & 2015 high resolution orthoimagery and Burlington County’s GPS road centerlines. In cases where digital CAD data or GIS data was supplied, the digital line work superseded the tax maps and pre-existing parcel boundaries.
- Major and minor subdivisions recorded at the County Clerk’s office were referenced to ensure that no new subdivisions were omitted. Subdivision plans were incorporated by scanning and using the same method as tax maps.

- Parcels were joined/related to the MOD4 tax assessor data and any parcels without a match in the MOD4 were investigated. Likewise, any MOD4 records that could not be matched to a parcel were also investigated.
- The township assessor was consulted regarding any Parcel/MOD4 mismatches that could not be resolved by the parcel editor. Those that still could not be resolved were documented.
