Title:

Burlington County Neighborhoods Map

Map Explanation:

A work still in progress but much closer to completion than at GIS Day 2014, the goal of this project is to help identify specific neighborhoods and developments within the county's municipalities. This can be used as a helpful resource when trying to quickly identify where a place exists amongst a myriad of small locations around the county. A wide variety of resources have been referenced including a historic place name database from the NJDEP, historic and current topographic maps and aerials (historicaerials.com), real estate websites (livingplaces.com, zillow.com), and Google Maps street view imagery.
