Dear Professional:

As you know, Burlington County, the Burlington County Bridge Commission, Rowan College at Burlington County, the Burlington County Institute of Technology/Special Services Schools and the Burlington County Library (Shared Services Entities) have recurring needs for engineering, surveying, review surveying and related applications. The County/Shared Services Entities are utilizing a fair and open process to create pools of qualified professionals from which the Shared Services Entities will draw from for specific projects. The County/Shared Services Entities, to create that pool, are soliciting qualifications from Engineering, surveying, review surveying and related services firms interested in providing the designated services.

A full RFQ document package may be downloaded from the Burlington County website at <http://www.co.burlington.nj.us/Legal>. Should you be interested in making a submission to be placed in the County's/Shared Services Entities pool of qualified professionals, please follow the directions in the RFQ.

There are a number of changes from the prior RFQ process and professionals should familiarize themselves with those changes.

- 1. PLEASE NOTE THAT CATEGORIES HAVE CHANGED FROM BURLINGTON COUNTY'S PRIOR RFQ LIST. SUBMITTERS SHOULD FAMILIARIZE THEMSELVES WITH THE NEW LIST. SUBMISSIONS MADE WHICH DO NOT CORRELATE TO THE NEW RFQ CATEGORY LISTING WILL NOT BE REVIEWED.**
- 2. Copies of the entire submission package must also be made at the time of submission of hard copy documents in TIFF format.**
- 3. Any and all comments must be made, in writing, before 1:00 PM on December 3, 2015. No documents or questions will be addressed after that date.**
- 4. The deadline for delivery of submissions, to the County, is 1:00 PM on Tuesday, December 8, 2015. There will be no extensions granted.**
- 5. The County and the Shared Services Entities are revising their current RFQ procedures. Therefore, the current RFQ pools for the Shared Services Entities will no longer be in effect as of January 1, 2016. To remain on a qualified pool list, you must respond to this solicitation.**

Please feel free to contact me if you have any questions about this matter.

FARMLAND PRESERVATION PROGRAM
PERFORMANCE SPECIFICATIONS / SCOPE OF WORK
FOR SURVEYOR SERVICES

(Revised June 26, 2013)

I. PURPOSE

Farmland preservation surveys are critical to four aspects of the County's Farmland Preservation Program (FPP).

- A. The survey will establish the outbounds (including metes and bounds description) of the subject lands owned in fee by the FPP applicant;
- B. The survey will establish the outbounds (including metes and bounds description) of that portion of the property that will be subject to the Farmland Preservation Program deed of easement restrictions.
- C. The survey is integral to the County's application for State cost-share funding grants for preserved farms.
- D. The success of the County's easement compliance monitoring and enforcement programs depends on accurate, detailed farm surveys.

The purpose of these specifications is to ensure that farmland surveys satisfy the requirements of these four program components.

EXHIBIT A

II. SURVEY REVIEWER

The County employs a Survey Reviewer to coordinate and review farmland surveys. The Survey Reviewer monitors the submission and quality of farmland surveys and serves as the primary contact for farmland surveyors.

II. PROCEDURES

The final products of the survey process shall be one survey plat that identifies (1) the outbounds of the subject farm property (fee ownership) and (2) the boundaries of the area subject to the FPP easement. A metes and bounds description of both the property outbounds and the easement area are required.

The County, the Survey Reviewer and the surveyor will follow the following procedures to obtain surveys for this program:

1. The County Department of Resource Conservation (DRC) will distribute a bid packet to surveyors, including a Request for Proposal (RFP) and a tax map and deed(s) for the subject property.
2. The surveyor will submit a bid for the survey(s) to the County DRC.
3. The County DRC will issue a Notice to Proceed to the successful surveyor, and will send additional information for the farm survey, including topographic data, information about future proposed drainage and road rights-of-way, the title commitment, and any surveys of adjoining deed-restricted farms.
4. The surveyor shall contact the landowner to schedule a "walk-through" on the property prior to, or at the time of, survey pins being set in order to insure receipt of the landowner's input on the property and easement boundaries. The surveyor shall notify the DRC of the date and time of the scheduled on-site meeting.
5. When setting survey pins, the surveyor shall also affix a marker of some kind (flagged stakes, or spray paint, for example) in the field so that the DRC staff and landowners can locate the set pins and surveyed courses during a subsequent field inspection.
6. The surveyor will submit **one copy of the** preliminary survey package [see Deliverables section] to the Survey Reviewer and 1 electronic PDF of their submission to the DRC by the deadline date specified in the Notice to Proceed.
7. The Survey Reviewer will review the preliminary survey for compliance with the Scope of Work (SOW). If the preliminary survey is not entirely compliant with the SOW, the Survey Reviewer will notify the surveyor of any discrepancies and request a revised preliminary survey. **Preliminary surveys should be reviewed within 10 business days.**

8. If a revised preliminary survey is required, the surveyor will submit the revised preliminary survey package [see Deliverables section] to the Survey Reviewer within ten business days of receipt of the written comments.
9. Once the Survey Reviewer has found a preliminary survey compliant with the SOW, the survey reviewer will **notify the surveyor. The surveyor should then forward two copies of preliminary survey package to the DRC contact person and he/she will forward copies to County Staff and other parties involved in the transaction for review. The reviewers will forward their comments to the DRC contact person, who will distribute all comments at one time to the surveyor and the Survey Reviewer.** The County DRC will request a final survey that incorporates all requested changes.
10. The surveyor will submit the final survey package [see Deliverables section] to the Survey Reviewer on or before the requested deadline. **The surveyor should copy the DRC on the letter of transmittal to the Survey Reviewer.**
11. If the final survey package is incomplete or in any way incorrect, the Survey Reviewer will immediately contact the surveyor to address the inadequacy. **Corrections must be made within 24 hours. When the final survey is compliant with the SOW, the Survey Reviewer will notify the surveyor. The surveyor should then send the final package to the DRC contact person.**

IV. PAYMENT

Requests for payment should be sent directly to the County DRC, *not to the Survey Reviewer or the County Legal Department.*

The following items must be submitted before payment can be processed:

1. A signed contract;
 2. An invoice for the work completed on company letterhead; and
 3. A signed County voucher for the amount indicated on the invoice.
- 60% of payment will be processed for payment after the preliminary survey is accepted by the Survey Reviewer and forwarded to the County for review.
- The final 40% of payment will be processed for payment after the Final Survey package is submitted by the surveyor and accepted by the County DRC.

V. PENALTIES

The following penalties shall be assessed when applicable:

1. Lateness – Charges of \$150/day shall be assessed on surveys that are submitted after their deadline, including preliminary, revised preliminary, and final surveys, and on incomplete survey packages. Extensions of time will be granted only for good cause and for extraordinary circumstances. Deadline extensions must be issued by the Department of Resource Conservation or by the survey reviewer in writing.

2. Omissions – A \$150 charge shall be assessed for EACH element of the SOW that is omitted from the preliminary survey package.
3. Failure to Correct Errors – A \$150 charge shall be assessed for EACH correction requested by the County’s survey reviewer that is not made in a subsequent version of the survey package.

VI. SURVEYOR RESPONSIBILITIES

A. General Responsibilities

1. Cost Proposals – The surveyor is responsible for preparing accurate proposals to cover all projected costs associated with the completion of work in accordance with the RFP, these specifications, and the surveyor’s contract. A surveyor’s failure to adequately project costs will not be accepted as justification for “additional work” payment requests.
2. Research – The surveyor is responsible for obtaining all documents and information needed to provide a survey plat which is correct and which complies with these specifications and standards. If any discrepancies are found or judgment calls need to be made in order to render the survey plat, the surveyor is to notify the County survey reviewer immediately.
3. Landowner Notification – The surveyor is responsible for notifying, in writing, the owner of the subject property (or other person named by the County) of the surveyor’s intention to access the property for the purpose of surveying it at least five business days prior to the scheduled visit. The surveyor is also responsible for securing permission from the owner of the property adjacent to the subject if access is needed.

The surveyor is not authorized to release any survey to the landowner (or landowner’s attorney, contact person, etc.) The County provides a copy of the preliminary survey to the landowner when appropriate. Any requests for surveys should be directed to the County Department of Resource Conservation.

4. Compliance with Laws and Regulations – The surveyor is responsible for complying with all laws and regulations, including the “Underground Facility Protection Act”, and procuring permits with regard to disturbance of wetlands. All survey work shall be performed in accordance with New Jersey laws and regulations pertaining to land surveying: N.J.S.A. 45:8 et seq., N.J.A.C. 13:40-1.1 et seq., and any other laws or regulations pertaining to this professional activity as may be amended or newly enacted.
5. Adherence to Standards – All requirements of accuracy and standards, including adjustments and methodology for the accomplishment of a stated accuracy, shall be in strict adherence to the most recent edition of *Classifications, Standards of Accuracy and General Specifications of Geodetic Control Surveys*, U.S. Department of

Commerce, N.O.A.A., N.O.S. Rockville, Maryland. Coordinated positions, bearings, and distances, including the methodology for their establishment, shall meet or exceed the published standards for Third Order, Class I accuracy, regardless of whether a surveying method (traversing, triangulation, or trilateration) or Global Positioning System (GPS) is used.

6. Response to Inquiries – The surveyor is required to respond to any questions regarding the survey from the County, any provider of monies used to fund the purchase of the easement (the SADC or others), or the County's title insurance agent.
7. Cost Estimate for Additional Work – If additional work, hearings, or other services related to the survey that are beyond the scope of these specifications become needed, the surveyor agrees to provide a written cost estimate and schedule to the County. The cost estimate shall be based on the rates in effect at the time of the surveyor's bid in response to the original RFP.
8. Reference Documents – The surveyor must provide copies of all deeds, reference maps and/or surveys, and other pertinent documents utilized to prepare the survey that were not included in the title report.

B. Field Procedures and Crew Responsibilities

1. Responsibility for Crews – The surveyor shall be responsible for the work of all survey crews. The crews shall cause as little inconvenience as possible to property owners when conducting the field survey.
2. Traverse Lines – Whenever possible, random traverse lines shall be run within the property being surveyed rather than on the lands of an adjoiner. If traverse lines are run on the lands of an adjoiner, no clearing of lines shall be conducted without the prior written consent of the property owner. Copies of the consent shall be forwarded to the County.
3. Minimum Impact – Painting and flagging evidence shall be kept to a minimum. Large trees shall not be cut to clear line without the prior written consent of the property owner. Copies of the consent shall be forwarded to the County. Brushing-out of lines shall be kept to a minimum.
4. Setting Monuments – Corner markers that are found in the field to be within a radius of 1.5 feet of the true corner calculated by the surveyor, shall be presumed to mark the corner and no new corner marker shall be set. Unless a monument is already in place, the surveyor shall set a rebar and cap at the limits of the easement where the limits adjoin lands not being restricted by the easement and at the Point of Beginning. If at the time of the survey the corners are found to be inaccessible, they shall be offset on line as near to the corner as may be practical and stamped "offset" on the cap. If any marker or monument will be set in an area that is in agricultural production, contact the County before setting the monument

Caps shall be labeled "Burl Co Farm Easemt", identify the surveyor and, if possible, include the month and year set.

VII. THE SURVEY PLAT

A. General Plat Requirements

1. Defining the Easement – The survey shall follow the border of the area that will be subjected to the easement – e.g., the survey shall follow within any identified future potential road rights-of-way. The survey shall NOT describe the property's boundary lines followed by deductions of the acreage for areas that will not be subject to the easement.
2. Number and Size of Plans – Unless otherwise directed by the County, a farmland premises consisting of either one tax lot or multiple contiguous tax lots shall be shown on a single plan. Noncontiguous lots in common ownership may be combined in a single plan only if detail and clarity of information are not sacrificed at the reduced scale of the plan. Clarity of information shall determine the actual size of the plat, but the surveyor shall use standard sizes in accordance with the "Map Filing Law."
3. Closure – Surveys shall close mathematically and all property lines of the surveyed parcel must form closed polygons: all sides must be defined by mathematical survey expressions (with angular units being degrees, minutes, and whole seconds of arc and horizontal distances, vertical elevations, radii of curves, lengths of arc, and New Jersey Plane Grid Coordinate values of Northing and Easting stated in feet to three decimal places).
4. Course Definition – All straight line courses shall be defined by bearings and distances. Curves shall be defined by radius, arc length, chord bearing, and chord length.
5. Conflicting Deed and Survey Courses – If the surveyor finds that the deed and the survey courses conflict, the surveyor should determine which is the correct course. The survey should show only the correct course.
6. Basis of Bearings – The New Jersey State Plane Grid Coordinate System (North American Datum 1983) shall be used. The surveyor is required to use a minimum of three (3) GPS reference control points for the NJ State Plan Coordinate tie, list control monuments used to establish horizontal control. The "grid factor" shall be applied to survey distances stated in feet to two decimal places. North American Datum (NAD) 1927 may be projected/converted to NAD 1983 using the Federal "CORPCON", or better, software.
7. Format of Area Figures – All areas reported in the survey are to be stated in acres, rounded to the nearest thousandth (0.000) of an acre. If the parcel being surveyed is bounded by a waterway or riparian interest claim, the final easement acreage shall be rounded to the nearest tenth (0.0) of an acre. Areas reported that are less than one acre should also be reported in square feet.

8. Subdivision in Process - If the landowner has or is preparing to subdivide any new lots, the surveyor will confirm the new lot numbers with the tax assessor. The lot to be subdivided shall be shown and labeled as a "proposed subdivision" on the preliminary survey. A separate written description is not necessary. The final survey shall show the block and lot numbers and the deed book and page numbers for the subdivided lot.
9. No Available Deed – Deeds of adjoining may be used to establish the property lines when no deed is available for the parcel being surveyed, or the parcel may be surveyed as "in possession." These surveys shall be labeled as "Surveyed without the benefit of a deed" and/or "Surveyed as in possession."
10. Show State Plane grid coordinates along with the coordinates as projected to the ground. If possible, coordinates should be shown on the longest lines.

B. Required Plat Elements

1. Title Block – The title block on the survey plat shall read: "Survey of Farmland Preservation Easement." It shall include the landowner's name, and the township, block, and lot of the property. It shall also include the date of any revision of the survey, including revisions of the preliminary survey(s) requested by the County.
2. Legend of Acquisition – In addition to the surveyor's standard title block, all plats shall contain the following:

<u>Legend of Acquisition</u>	
Property of:	_____
Owner's Address:	_____
Property Address:	_____
Block: _____	Lot: _____
Municipality: _____	County: _____

Please note that the property address should be listed, even if it is the same as the owner's address.
